INDUSTRY QUESTIONS AND GOVERNMENT RESPONSES

Solicitation No. 75F40126Q00386
HFP-2026-134637 – Walk-In Laboratory Cooler

The following questions were received from industry regarding the solicitation, followed by the Government's responses.

Question 1: Specifically, the SOW states that installation and site preparation are not included in the requirement, while also stating that the Quoter should identify any manufacturer installation, startup, inspection, or certification requirements necessary to activate or maintain the manufacturer's warranty.

Could you please confirm whether installation charges may be included as an optional item, if required by the manufacturer, or whether installation should not be included in the proposal at all?

Government Response: Installation and site preparation are not included in the Government's requirement and should not be included in the base quoted price.

If the proposed manufacturer requires installation, startup, inspection, certification, or another specific service in order to activate or maintain the manufacturer's warranty, please clearly identify that requirement in your quotation.

If there is an associated cost, please identify it separately from the equipment price for informational and Government review purposes. The Government is not requesting contractor installation under the current solicitation.

Question 2: Could you please confirm one more thing? The solicitation states that post-installation technical validation and operator training are required.

Since installation is not included in the Government's current requirement, please clarify whether the contractor must provide operator training or if providing the manufacturer's operator manual/documentation is sufficient.

Government Response: Operator training and post-installation technical validation are not required under the Government's current requirement. Providing the manufacturer's standard operator/user manual, installation documentation, maintenance documentation, and applicable warranty information will be sufficient.

As previously clarified, installation and site preparation are not included in this requirement. If the manufacturer requires any specific startup, inspection, certification, or training in order to activate or maintain the manufacturer's warranty, please identify that requirement separately in your quotation.

Question 3: Can you please also confirm that multiple responses/quotes or solutions are acceptable?

Government Response: Yes, multiple proposed solutions/configurations are acceptable.

If submitting more than one solution, please clearly identify and separately price each proposed configuration. Each solution should include sufficient technical information and product literature to demonstrate compliance with all minimum requirements of the Statement of Work.

Each proposed solution will be evaluated independently for technical acceptability and price in accordance with the solicitation.
